Revised

Permit Application Package for Pine Bliss LLC

8151 FM 315 South

Larue, Texas 75770

jstover@ssbwww.law

September 10, 2024

Dear NTVGCD,

We are presenting the following **revised** permit application package to support permitting a well field at Pine Bliss LLC (also known as Bluebonnet) in Henderson County (near Lake Palestine); this package addresses the requested changes by the district. This package relies on the latest scientific research available that has been executed by LRE Water in May and August of 2024 which supports our volumetric request and provides hydrogeological analysis.

In the interest of simplicity and ease of analysis, we are submitting this this request with this cover letter, this summary, 21 separate permit applications, the sustainability report, and the hydrological reports. In this summary you will find the relevant well information in a table for ease of use. For the fees, the casing is to be determined, so we included the maximum amount of \$400 dollars per permit totaling \$8400 to account for the largest possible casing in our original permit (paid). After hydrological review it was determined that we could be more efficient if we added one well, so we are including a check for \$400 to account for the addition of the permit for WLX-11.

All wells are set back $\frac{1}{4}$ mile from the property line and we included a list of neighboring property owners. The purpose for which drilling, and production, is requested includes all beneficial purposes as those terms are defined in Section 36.001(9), Texas Water Code, and NTVGCD Rule 1(c), as the same may be amended from time to time. We will comply with District's rules and will comply with the Management Plan. We will comply with District plugging and capping guidelines.

We look forward to continuing to work with you through the permitting process; please reach out to us if you have any questions.

In this packet you will find the:

Summary (this document, which includes adjacent landowner information)

The Hydrological report as requested in your letter (Two reports: Queen City and Wilcox. As requested this considers the entire well field and the individual wells are in the appendices)

Updated permit applications

Engineer's sustainability report (not included here, previously provided)

There is a significant amount of information we are presenting to you, for your convenience we are also providing a link to a digital file where you can find copies of all the permit information.

Sincerely,

Quinn McColly, PhD
Managing Director of Water Resources

Summary

Based on the report generated by LRE, we are applying for 22 permits, 11 of which are in the Queen City aquifer and 11 of which are in the Middle Wilcox aquifer. These wells total expected production of 15,840 AF/yr. While the LRE report describes water availability in the Reklaw/Carrizo we will not target this shallow formation which will help ensure local users will have access to ample water supplies. In addition, while 6,348 AF will come from the Queen City, there are sufficient supplies in that formation to also maintain local access. In this manner we are protecting the aquifer that is most likely to be used for domestic and agricultural purposes. The following table lists the proposed wells and the attendant expected production per well based on leaving 30% available drawdown after 50 years of production (pp. 42-43 of LRE sustainability report) and includes the information required in the permit application. Distance to the nearest well is calculated using the nearest well in the same aquifer. Distance to septic is the lesser of the nearest field septic or the property line.

Well ID	Latitude	Longitude	GPM	gal./yr.	AF/yr.	Dist to Existing	Dist to Prop Line	Dist to Septic

District Rule 5.4

To help facilitate the large amount of data in this package, following are the permit application requirements as described in District Rule 5.4 (a-k) and where that requirement can be found in this package.

- a. Applicant information on each permit application.
- b. NA
- c. Included in the hydro-geologic report furnished with each permit application.
- d. As per discussion with the District's counsel, we are furnishing 3 printed copies of a map depicting CAD property lines with the proposed well locations and we are including the pertinent information of adjacent property owners. This list is directly after this section but is also in the file room we created for your convenience. This map will be in the digital file room should you need it.
- e. NA
- f. The purpose for which drilling, and production is requested includes all beneficial purposes as those terms are defined in Section 36.001(9), Texas Water Code, and NTVGCD Rule 1(c), as the same may be amended from time to time. Volumes are described in the table above and in the permit applications.
- g. We will comply with the District's Rules and all groundwater use permits and plans promulgated pursuant to the District's Rules.
- h. We will comply with the Management Plan.
- i. Locations and volumes are in the table above and in the well permit applications.
- j. We will comply with all District well plugging and capping guidelines and report closure to the Commission.
- k. We have provided a hydrogeological report addressing the area of influence, draw down, recovery time, and other pertinent information in the permit applications and significant supplementary information can be found in the sustainability report.

Adjacent property owners list follows.
